Volume 129 1982 UK ISSN 0143–7089

HONORARY EDITORS

Dr. D.G. Haigh, *Imperial College, London*
M.J. Withers, *Andrew Antennas, Fife*

Pages in issues of *IEE Proceedings Part G*, 1982

Pages	Issue no.	Date
1–28	1	February
29–60	2	April
61–108	3	June
109–204	4	August
205–256	5	October
257–300	6	December

This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright Act 1956, part 1, section 7, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by the UK Board of Trade Regulations (Statutory Instruments, 1957, no. 868), no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown.

An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to ten copies of an IEE paper or article.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made in the USA for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per-copy fee through the Copyright Clearance Center Inc. for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes for creating new collective works or for resale.

Photocopies of individual papers published in the *IEE Proceedings* can be obtained from the IEE Library at 10p a page plus a handling charge of 50p per paper, which covers the cost of surface mail (airmail extra). The handling charge is waived if reprints are collected from Savoy Place by purchasers.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

Subject index

AMPLIFIERS

Active compensation of op-amp circuits. D.T.Nguyen and L.H.Ting p214

ANALOGUE-DIGITAL CONVERSION

Programmable waveform generator using linear interpolation with multiplying D/A convertors. M.S.Towers p19

CIRCUIT THEORY AND DESIGN

A modified objective function and a fast algorithm for design centering. D.Agnew p110
A sensitivity-based approach to tolerance assignment. A.Ilumoka and R.Spence p139
Active compensation of op-amp circuits. D.T.Nguyen and L.H.Ting p214
An unconstrained nonlinear programming approach to design centering. F.Aidt and H.Gaunholt p115
Correlation-coefficient optimisation in integrated-circuit design. A.R.Thorbjornsen p199
Design centering and tolerancing, considering environmental effects via a new type minimax optimisation. E.Halász p134
Digital double boxcar integrator for pulsed NMR experiments. P.Narashimha Reddy and B.P.Nagi Reddy p245
Estimating manufacturing yield by means of Jacobian of transformation. A.S.Cook and T.Downs p127
General theory of broadband matchinc. W-K.Chen and C.Satyanarayana p96
Generalised cut map algorithms for tolerance and tolerance-tuning problems. A.Voreadis p160
Ripple determination for switch-mode DC/DC convertors. K.C.Daly p229
Sensitivity analysis of nonlinear circuits. B.Lojek p85
Specification sensitivity and its use in system design. L.Gefferth p181
State-space approach for the analysis of networks containing lossy coupled transmission lines in inhomogeneous media. M.I.Sobhy, S.S.Bedair and M.H.Keriakos p89
State-space synthesis of optimum active biquads. D.T.Nguyen p280
Statistical modelling for integrated circuits. P.J.Rankin p186
Tolerance analysis and design of electrical circuits (Editorial). A.A.Ilumoka p109
Tolerance design via cost minimisation. N.Maratos p150
Transformer description of a family of switched systems. S.Singer p205
Variability analysis and design of an integrated circuit using sensitivity information. B.Haasakker and I.W.Jones p192
Variability reduction: statistically based algorithms for reduction of performance variability of electrical circuits. A.Ilumoka, N.Maratos and R.Spence p169
Yield enhancement realised for analogue integrated filters by design techniques. K.Knauer and H.-J.Pfleiderer p122

CODES AND DECODING

Effects of finite word length on the performance of split-band coding systems using quadrature mirror filters. S.W.Foo and L.F.Turner p257

COMPUTER-AIDED DESIGN

An unconstrained nonlinear programming approach to design centering. F.Aidt and H.Gaunholt p115
Computer-aided design of all-pass digital filters: application to the phase linearisation of recursive differentiators. J.Lefevre p256
Correlation-coefficient optimisation in integrated-circuit design. A.R.Thorbjornsen p199
Design of 2-dimensional circularly-symmetric digital filters. C.Charalambous p47
State-space approach for the analysis of networks containing lossy coupled transmission lines in inhomogeneous media. M.I.Sobhy, S.S.Bedair and M.H.Keriakos p89

DIGITAL CIRCUITS

Accelerated procedure for the design of equiripple nonrecursive digital filters. A.Antoniou p1 e107
Compensation for the effects of the D/A convertor in recursive digital filters. A.Antoniou, M.Degano and C.Charalambous p273
Design of 2-dimensional circularly-symmetric digital filters. C.Charalambous p47
Design of separable denominator 2-dimensional digital filters possessing real circularly symmetric frequency responses. P.Karivaratha Rajan and Swamy. M.N.S. p235
Digital control of active networks using variable resistors. M.R.Belmont and M.Dorrington p106
Stability margins in a design method for 2-dimensional recursive digital filters. G.Crebbin and J.Attikiouzel p76

FILTERS AND FILTERING

A sensitivity-based approach to tolerance assignment. A.Ilumoka and R.Spence p139
Accelerated procedure for the design of equiripple nonrecursive digital filters. A.Antoniou p1 e107
Approximate expression of jitter amplitude by slew rate in RC-active filters. J.A.Gregorio, J.M.Drake and A.M.Burón p55
Compensation for the effects of the D/A convertor in recursive digital filters. A.Antoniou, M.Degano and C.Charalambous p273
Computer-aided design of all-pass digital filters: application to the phase linearisation of recursive differentiators. J.Lefevre p256
Design of 2-dimensional circularly-symmetric digital filters. C.Charalambous p47
Design of nonrecursive quadrature mirror filters. S.W Foo and L.F.Turner p61
Design of separable denominator 2-dimensional digital filters possessing real circularly symmetric frequency responses. P.Karivaratha Rajan and Swamy. M.N.S. p235
Digital control of active networks using variable resistors. M.R.Belmont and M.Dorrington p106
Effects of finite word length on the performance of split-band coding systems using quadrature mirror filters. S.W.Foo and L.F.Turner p257
Gain-tuned programmable 2nd-order filters with VCVS. J.Zurada and K.Goodman p221
Lowpass filters by cascading low-Q 3rd-order blocks. M.Biey and A.Premoli p26
Roundoff noise upper bounds for cascaded recursive digital filter structures. K.Mondal and S.K.Mitra p250
Stability margins in a design method for 2-dimensional recursive digital filters. G.Crebbin and J.Attikiouzel p76
State-space synthesis of optimum active biquads. D.T.Nguyen p280
Transfer functions of selective filters with equalised passband group delay response. B.D.Rakovich, M.Dj.Radmanović and M.V.Popovich p11
Tunable state-variable bandpass filter. A.Eguizabal-Rivas p211
VIS-SC-filters with reduced influences of parasitic capacitances. D.Herbst, J.Pandel, A.Fettweis and B.Höfflinger p29
Yield enhancement realised for analogue integrated filters by design techniques. K.Knauer and H.-J.Pfleiderer p122

INTEGRATED CIRCUITS

Completely iterative, pipelined multiplier array suitable for VLSI. J.V.McCanny and J.G.McWhirter p40
Injected voltage low-power CMOS for 3-valued logic. H.T.Mouftah and K.C.Smith p270

LOGIC

Injected voltage low-power CMOS for 3-valued logic. H.T.Mouftah and K.C.Smith p270

MATHEMATICAL TECHNIQUES

A modified objective function and a fast algorithm for design centering. D.Agnew p110
A sensitivity-based approach to tolerance assignment. A.Ilumoka and R.Spence p139
Accelerated procedure for the design of equiripple nonrecursive digital filters. A.Antoniou p1 e107
Compensation for the effects of the D/A convertor in recursive digital filters. A.Antoniou, M.Degano and C.Charalambous p273
Completely iterative, pipelined multiplier array suitable for VLSI. J.V.McCanny and J.G.McWhirter p40
Design centering and tolerancing, considering environmental effects via a new type minimax optimisation. E.Halász p134
Estimating manufacturing yield by means of Jacobian of transformation. A.S.Cook and T.Downs p127
Functional relation between PRF and inductive or capacitive systems. F.M.Reza p291
Generalised cut map algorithms for tolerance and tolerance-tuning problems. A.Voreadis p160
Product of inductive and capacitive operators. F.M.Reza p241
Roundoff noise upper bounds for cascaded recursive digital filter structures. K.Mondal and S.K.Mitra p250
Specification sensitivity and its use in system design. L.Gefferth p181
Statistical modelling for integrated circuits. P.J.Rankin p186

Theory and application of semi-indefinite networks. P.R.Bryson and G.M.Wierzba p285
Tolerance design via cost minimisation. N.Maratos p150
Transfer functions of selective filters with equalised passband group delay response. B.D.Rakovich, M.Dj.Radmanović and M.V.Popovich p11
Variability analysis and design of an integrated circuit using sensitivity information. B.Haasakker and I.W.Jones p192
Variability reduction: statistically based algorithms for reduction of performance variability of electrical circuits. A.Ilumoka, N.Maratos and R.Spence p169

NETWORKS

Digital control of active networks using variable resistors. M.R.Belmont and M.Dorrington p106
Functional relation between PRF and inductive or capacitive systems. F.M.Reza p291
General network solutions of minimum resistive biquadratic driving-point functions. R.E.Vowels p103
General theory of broadband matchinc. W-K.Chen and C.Satyanarayana p96
Lowpass filters by cascading low-Q 3rd-order blocks. M.Biey and A.Premoli p26
Product of inductive and capacitive operators. F.M.Reza p241
State-space approach for the analysis of networks containing lossy coupled transmission lines in inhomogeneous media. M.I.Sobhy, S.S.Bedair and M.H.Keriakos p89
Switching networks for realisation of variable DC transformers coupled to rectangular arrays. S.Singer p69
Theorem on bounded PRF. F.M.Reza p59
Theory and application of semi-indefinite networks. P.R.Bryson and G.M.Wierzba p285
Transient analysis of tapered distributed RC networks using finite elements. A.J.Walton and B.J.Marsden p295

NOISE AND INTERFERENCE

Roundoff noise upper bounds for cascaded recursive digital filter structures. K.Mondal and S.K.Mitra p250

PULSE-CODE MODULATION

Digital double boxcar integrator for pulsed NMR experiments. P.Narashimha Reddy and B.P.Nagi Reddy p245

SIGNAL PROCESSING

Digital double boxcar integrator for pulsed NMR experiments. P.Narashimha Reddy and B.P.Nagi Reddy p245

TRANSDUCERS

General theory of broadband matchinc. W-K.Chen and C.Satyanarayana p96

Book Reviews

Applications and design with analog integrated circuits: J.M. Jacob p272
Data-conversion integrated circuits: D.J. Dooley p39
Handbook of rectifier circuits: G.J. Scoles p28
Network theory and filter design: V.K. Aatre p210
